[About us](#)

About Us

3d-labs provides cost effective and high quality state-of-the-art computer aided designing and drafting services throught offshores facilities in India.

It forms an important part of 3d-labs global strategy of providing substantial services in the KPO industry.

Our emphasis of creating value through commitment has earned us the trust of our global clientele, and has driven our exponential growth.

Our Vision

The process of growth will be marked by the highest quality standards in the area of Engineering Design and Drafting and by providing time bound, cost effective and quality solutions to our customers.

Our Mission

To provide Architectural and Engineering services of international standards to companies across the globe while maintaining high levels of customer satisfaction and profitability.

Our work culture is supported by positive attitude, extensive experience, and strong core values, which contribute to our strong performance, productivity and retention.

Core Values

Customer Satisfaction
Responsive Customer Service
Integrity and Transparency
Pursuit of Excellence
Well-being of Employees and Community
Honesty
Confidentiality of the client data
Security

We provide solutions for a dynamic environment where business and technology strategies coverage. We continually strive to meet the unique needs of each client. Our flexible in-house capacity, combined with our own vast experience and strong resource base allows us to provide comprehensive services, ensuring continuity, consistency and design quality.

Our business model is to partner with clients to act as a back-bone of all non-core engineering functions like detail design, engineering analysis, drafting, solid modeling, animation, walkthrough and documentation to enable clients to focus on their core competencies.

Thanks for visiting. :)
